STONE REFERENCE

Flagstone (Builders Stone)

3-5" thick, irregular shapes, average length and height is 1' with a natural face. Available in white, gold, brown and sandstone.

Drystack

Available in natural and saw cut, commonly used for retaining walls. Sizes range from 5" -8" high x 6-12" deep, random lengths. Available in white, cream & sandstone.

Saw Cut, Natural Face

Available in 2-12" heights, 3-5" thick, rectangular in shape, random lengths. Sawed top and bottom with natural split face. Available in white, cream, gold, brown, lueders, cave, ballinger and sandstone.

Natural Chopped

Available in 4-8" heights, 3-5" thick, rectangular in shape, random lengths. Split on all sides. Available in white, cream, gold, brown and sandstone.

Natural Split Patio

1-3" thick, irregular shapes, average length and width is 1' with a rough face. Available in white, gold and brown. Also available in sandstone 1 ½-2 ½" thick.

Saw Cut Patio

Available in 1 ¼" and up thicknesses. Typically comes in 22" wide by 4 - 5' long slabs, may be smaller. Available in white, cream, lueders, ballinger and sandstone.

Thin Stone

Flats: 1 ¼" deep, various heights to 12", random lengths.
Corners: 1 ¼" deep, nominal 3" return, various heights to 12".
Available in all types of stone.

Lintels & Sills

Sawed top and bottom, chopped or vermeer sawed ends, face & back. Typical sizes range from 4"-10" high x 6" depths, 36" or 42" lengths. Custom sizes also available. Available in white, cream, lueders and sandstone.

Mantles & Hearths

Custom made to order. Available in white, cream, lueders and sandstone.

STONE COVERAGE

3-5" thick (standard brick ledge)

White, Cream, Gold, Cave, Brown, Ballinger, Sandstone: 40-45 sq. ft per ton

Lueders: 35 sq. ft. per ton

Drystack

5 x 8" = 25 sq. ft.
5 x 10" = 20 sq. ft.
6 x 6" = 30 sq. ft.
6 x 8" = 25 sq. ft.
6 x 10" = 20 sq. ft.
6 x 12" = 15 sq. ft.
8 x 8" = 25 sq. ft.

Natural Split Patio

1-3" thick = 70 sq. ft.

Saw Cut Patio (white or cream)

3" thick = 60 sq. ft.
2" thick = 80 sq. ft.
1 ¾" thick = 100 sq. ft.
1 ½" thick = 120 sq. ft.
1 ¼" thick = 140 sq. ft.

Thin Stone

Flats: 170-180 sf per pallet
(1 pallet = 1 ton)

Corners: 150 linear feet per pallet
(1 pallet = approx 1500 lbs)

It is important to keep in mind that stone is a product of nature and its colors and sizes will vary. All natural stones vary in color, texture, and character. The end results of your project will depend on your masonry crew. If every piece has one side of color, but is turned to the inside of the wall, a very different look will be achieved than if the color is managed correctly. A sample panel of the look you desire and a good flow of communication with your mason about the look you wish to achieve are very important.

THIN STONE VENEER

—NATURAL STONE—

Why Thin Veneer?

Light Weight: thin stone weighs approximately 11-13 lbs. per sf compared to 40-45 lbs per sf of traditional building stone.

Can go on multi-story buildings more easily.

No special footings required.

For long distance delivery, 4 times as much stone can be shipped at a time.

Faster & easier installation.

Availability: All cuts and colors

See pg. 3 for sizes & coverage

COMMERCIAL

—NATURAL STONE—

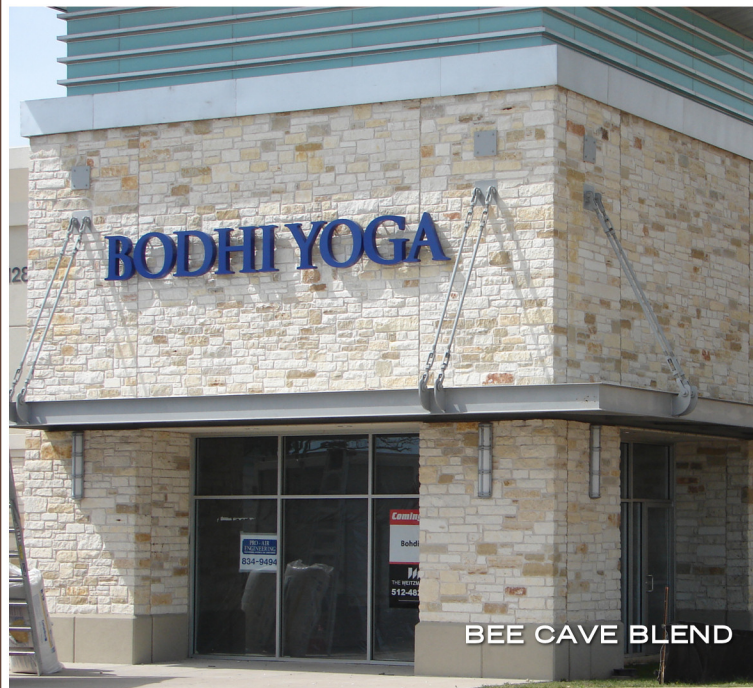

When you purchase from Jim Cherry Stone, you need not worry about our ability to deliver what we promise, when we promise it.

We understand that once a job has started, consistency and reliability are critical.

We are careful not to promise things we cannot do just to get the job. Our philosophy is to treat folks the way we would want them to treat us.

This includes being honest, fair and always committed to delivering the highest quality products possible.
